ENGLISH USER MANUAL

- The camera kit explained
Components
Recipient
Security camera
Power cables
Mounting screws
Control Mouse
Internet cable

The receiver (1) is the brain
behind this camera system. This
ensures that all cameras work
together and can be seen, on a
monitor that can be connected, or via the free app.
The cameras (2) are really what it's all about. These ensure that you
have more eyes! These cameras are great for indoors or outdoors.
The power cables (3) provide power for the cameras and the receiver.
**Please note, the 12v1a power cables are for the cameras, the 12v2a
power cables are for the receiver.**
The mounting screws (4) are there so that the cameras can be hung!
The control mouse (5) allows you to control the receiver.
With the internet cable (6) you can connect the receiver to the internet,
this way you can connect the free app to your camera system and watch
live anytime, anywhere!
We recommend placing the receiver in the center of all cameras to
optimize signal reception.

- 1. Antenna
- 2.VGA output
- 3.HDMI output
- 4. LAN Connection
- 5. USB Connection
- 6. Power supply (12v2a)

STEP PLAN FOR INSTALLING.

1. Supply the receiver with power and connect the mouse, a monitor and possibly the internet cable to the monitor.
2. The receiver will turn on itself as soon as it receives power.
3. You will see a login screen on the connected monitor, log in there with "User" = "admin", and "Password" = "admin". This username and password can be changed later in the settings.
4. The receiver is ready for use (preference setting is possible later).
5. In order for the cameras to appear on the screen, we also need to supply them with power. Use the power cables 12v1a for this. (Do not mount the cameras yet, first check whether they are visible on the monitor, check the following steps for this!)
6. As soon as the cameras are supplied with power and within range, they would automatically become visible on the screen within 3 minutes.
7. If the signals are OK, you can mount the cameras.

SET UP THE APP

1. The app we use to operate and watch the cameras live is called "TUYA SMART", and can be downloaded for free in the app store and google play store.
    Open this app and create an account.
2. To connect the cameras, make sure that the receiver is connected to the internet by connecting an internet cable between the receiver and a router.
3. Open the app, and click on "Add devices", then scan the cloud ID QR CODE of the receiver via the app (located at the top right).
4. The next steps follow automatically.

ENGLISH MANUAL

IMPORTANT PRECAUTIONS

Basic safety precautions should be followed when using this product, including:
> READ ALL INSTRUCTIONS BEFORE USE

- Before use, inspect all parts for scratches, holes, tears, worn areas, discoloration or loose stitching, and other unusual issues. If something is wrong with a part, do not use the product and contact our customer service as soon as possible.
- This product is not a toy, so it is not intended to be played with. So also keep the elements away from children, pets or any other individuals who need supervision.
- Close supervision is necessary when used by or near children.
- When using this product and its elements, make sure that the elements (such as the cameras) are mounted properly.
- Before use, check that all parts are correctly positioned and attached.
- Use all parts only and always responsibly.
  lubiX cannot be held accountable and/or responsible for the possible consequences of using this product.
- Keeps the parts from being too hot (> 35 degrees Celsius) or too cold (< -15 degrees Celsius) for a long time.
- Do not use the elements unless they are properly adjusted.
- Use the parts only in the way for which they are intended.
- Only use this product in responsible and thoughtful ways.
- Clean all elements regularly.
- Do not disassemble and/or attempt to modify this product.
- This product is not a medical device.
- This product is not intended for use in the freezer or microwave.
- Avoid cleaning with chemical tools. Regular cleaning with just a damp cloth is sufficient.
- Keeps non-watertight elements out of damp areas.
- Avoid strong shocks or impacts.
- The terms and conditions of that app apply to the use of the app.
- If an element smokes, gives off a foul odor, heats up or shows abnormal symptoms, there may be a risk of fire or electric shock, take the following measures as soon as possible:
  1. Disconnect the power cord from the wall outlet.
- Do not use the power cables for objects other than this camera system.

THIS PRODUCT IS FOR HOUSEHOLD USE ONLY

> PACKAGE CONTENTS

4x Security cameras

1x Receiver

4x Mounting screws

5x Power adapters

1x Control Mouse

1x Internet cable

> CLEAN AND STORE YOUR ELEMENTS

To clean the elements, we recommend wiping with a damp cloth. Do not use soap or other cleaning agents on the elements as they may damage and/or weaken the materials.

We recommend storing this product and associated elements in a cool, dry place away from moisture, heat and direct sunlight.
